I am an experienced and qualified Senior Software Engineer with a focus on strong process driven development. I am passionate about all stages of development, from architecture, UX to development, testing and shipping.

Technical skills:
Javascript, React Server Components, ReactJS, React Native (Expo), NextJS, TypeScript, GraphQL/Apollo, tRPC, Tailwind, Drizzle ORM, Cypress, component architecture, CSS/Animation, TDD, Responsive design, Git/GitHub, Agile Scrum/Kanban, Storyblok, Contentful

Current focus/Future development:
React, AI development, tRPC, full stack development, local-first development

Work Experience:

Virgin Media/O2, London (remote)
August 2024 – Present
Senior Software Engineer/Frontend Lead
NextJS, React Server Components, CSS modules, Storyblok
- Joined as Senior Front End Engineer, promoted to **Front End Lead** and **Digital Libraries Owner**.
- Built FE architecture on a large-scale **O2 broadband acquisition platform** using **Next.js (RSC)** and REST services.
- Defined reusable component patterns and coding standards adopted across teams.
- Rebuilt the company's Angular design system (**Momentum**) as a **React, Next.js-optimised monorepo** (6 packages, 3 apps) serving as the single source of FE assets.
- Front End Lead for **O2 Stores back-office platform**; integrated new services, co-designed CI/CD, and managed **2 FE engineers + 5 QA**.
- Mentored junior engineers and supported cross-team delivery.

Diageo, London (remote)

November 2023 – August 2024

Team Lead Developer

NextJS, React Server Components, Tailwind, Contentful

- Senior engineer on **Guinness.com Next.js transformation**, rebuilding the platform with **Contentful CMS**.
- Drove performance improvements using Lighthouse/Unlighthouse, meeting strict load-time targets.
- Promoted to **Lead Engineer** on a parallel transformation project, leading **2 full-stack engineers + 2 QA**.
- Mentored engineers and provided technical support across teams.

Fungible Systems/Opus Bitcoin Wallet, New York (remote)

December 2022 – September 2023

Software Engineer

React Native (Expo), React (RSCs), NextJS, tRPC, sqlite

- Senior software engineer primarily building a Bitcoin wallet in Expo
- Integrated new database services SQLite/Supabase/Turso
- Built react native component library
- Rapid development environment, low friction, fast delivery
- Worked closely with all Lead design and engineer to ship features efficiently

AccessFintech, London/Tel Aviv (remote)

February 2019 – December 2022

Tech Lead & Senior Developer

React/NextJS, Apollo/GraphQL, team management

- Senior engineer on a **trade risk management platform** used by tier-one global banks.
- Built the front end **from scratch**, including application architecture, component libraries, and GraphQL/Apollo services as part of a front end team of 5 engineers
- Built a solo project to map client services data into common format (React)
- Strong focus on **performance, code quality, and review-driven delivery**.
- Promoted to **Front End Lead**, managing **6 engineers** and multiple QA.
- Front end management including hiring
- Established dev guilds, standards sessions, and knowledge-sharing culture.

Shell, London
